Mrs. Henry Clarke Coe, her with a long list of prominent people, has together with a long list of prominent people, has evolved a series of theatre and dinner parties which will excel in brilliancy anything which has been given heretofore by this set. Owing to the great demand for guest tickets in advance they have been obliged to increase the membership. This has awakened fresh interest, and on the tave been colliged to increase the membership. The boxes will be occupied chiefly by the ratronesses, who have made up parties of friends for this special occasion. From the theatre members will be conveyed to Delmonico's, where an elaborate banquet will be served, after which there will be general dancing. Parker, of Sacramento, Cal., in 1800. Mrs. Parker was married in California in 1850, and her golden wedding was the first one ever celebrated by any one married in that State.

THE GENERAL MARKET REPORT.

THE GENERAL MARKET REPORT.

New-York, November 18, 1905.

COFFEE—The coffee market opened steady at unchanged prices to an advance of 5 points in response to steady European cables, but further reports of rain in Brazil checked general demand, and the market eased off under scattering liquidation, with the close steady, net unchanged. Sales were reported of about 27,000 bags. Considering the local close of Fricay, the European markets were tavorable. Havre opened ¼ franc lower, but recovered the loss, and Hamburg was unchanged on all months except November, which was ¼ pfg lower. The Brazillan markets were also regarded as making a favorable showing, prices being unchanged, while the rate of Brazillan points continued on about the recent scale, as compared with last year, the two ports getting 53,000 bags, saginst 39,000 last year. There was compared with last year, the two ports getting 53,000 bags, saginst 39,000 last year. There was comparatively little switching, and some traders expressed the opinion that the December interest was pretty well liquidated, although this view of the situation was by no means gengal, and some are looking forward to activity next week in this direction. The rains in Brazil consisted of showers in the Jahu district, and more important precipitation in Ribeirso Preto, while the remaining three districts reporting were cloudy. So far it hardly appears that the precipitation has been general enough to remove all cause of complaint, and nothing has been received from Brazil relative to an improvement in the crop outlook. The market to spot coffee was steady, with quotations on the basis of 85-160 for Rio No 7.

cover quits a wide range. Many expect that the daily ginning returns since November 1 will equal the amounts between October 18 and November 1, and that the report expected will show in the neighborhood of 8,000,000 bales. But even if the trade was sure of the amount ginned there would still be uncertainty regarding the indicated crop. Official comparisons are available for only two years. On November 14, 1903, about 69 per cent of the crop had been ginned, and in 1904 about 73 per cent. The range of contract prices in the local market to-day was as follows;
